

HOW-TO GUIDE: INSULATED FREEZER BLANKETS

Blanket Storage

- Blankets should be stored in a cool dry place. Blankets do not need to be stored in a refrigerator or freezer
- When in use condensation may collect on your freezer blanket, ensure your freezer blanket is completely dry before folding and storing
- Blankets are machine washable

Blanket Use

1. Cover perishable food items (refrigerated or frozen foods) with freezer blanket(s)
2. If you have space, you can also place items on top of blanket and wrap it over to fully envelope cold items
3. In a truck or open vehicle, bring ratchets or bungee cords to secure blanket during transportation
